Statement on Pluralism

The graduate health science programs at the Katz School of Science and Health prioritize individual dignity and promote a culture of pluralism in a supportive patient care, learning, and research environment.

The PA Program is committed to creating a community that recognizes and embraces diverse backgrounds and identities. Every student, faculty member, patient and their family will be treated with respect, dignity, and professionalism. We do not tolerate or condone discrimination. We are committed to delivering health care and education in a manner that respects multiculturalism with the full intent of achieving better health, happiness and quality of life for all.
