Occupational Therapy Doctorate

## **Occupational Therapy Doctorate Program Learning Objectives**

Upon successful completion of the Occupational Therapy Doctorate program, students will be able to:

- Develop and implement client-centered care that is inclusive of cultural values, beliefs and needs.
- Demonstrate effective communication skills to function successfully as a member of an interprofessional health care team.
- Apply critical analysis of evidence during the occupational therapy process and participate to increase the body of knowledge of the profession through the preparation and dissemination of scholarship.
- Design interventions with a central focus on occupation as the means and end of the therapeutic process that are in line with the profession's philosophy.
- Implement interventions with a central focus on occupation as the means and end of the therapeutic process that are in line with the profession's philosophy.
- Integrate health promotion and wellness in interventions with individuals, communities and populations.
- Model and demonstrate leadership and advocacy for occupational therapy in the full range of service areas.
